# UNDYED & AWARE™

## AWARE™ - DARINGLY SIMPLE TRACEABILITY

How can we build trust in sustainability claims? By ensuring trusted traceability for every step of the supply chain with Aware™ technology.

Starting from the very origin of an item's fabric, this innovative solution brings unprecedented transparency to the supply chain. By embedding a physical tracer into sustainable raw materials. This tracer can be authenticated with the Aware™ hand scanner from every tier of the supply chain anywhere, anytime. The blockchain platform securely records production information, creating a digital replica of the material's journey, ensuring accurate data for recycling processes. Digital tokens, the Aware™ Crypto TCs™, validate every step, upholding the integrity of the supply chain information. The user-friendly Virtual ID acts as a digital product passport for consumers and simplifies making informed choices.

## UNDYED

These products are made from 'Undyed' fabric. No dyes, water or chemicals are needed in this innovative process, which means it has less negative impact on our planet. Starting with textile waste from manufacturers and traders, the colour of the waste dictates the final hue. After manual sorting and quality checks, the waste is recycled into cotton fiber without chemicals. Blended with other recycled fibers, like polyester, viscose, acrylic, EcoVera™, or Tencel™, the resulting yarn is strong and high-quality. Through careful processing, the material is formed and spun into the final, more sustainable coloured yarn.

# GRS certified materials.

Tracing recycled inputs from source to store.

# OUR GRS CERTIFIED COLLECTION

GRS certified products are made from verified recycled materials, with a traceable supply chain from the original source. To be GRS certified, a product must contain at least 50% recycled materials. Together with our printing facility in Poland, we have obtained the Global Recycled Standard certification for a multitude of our printed products, including clothing and bags.

## **Together for a sustainable future**

Add value to your business and customers by consciously choosing recycled products, you take responsibility and inspire others to do the same. With each product, you communicate what your brand is all about.

## Green Points

With every product in this catalogue, we mention a value in Green Points. These points can be used to navigate the collection and identify the more sustainable options. We have identified 8 different elements that give a transparent overview of the impact of a product. Elements scored are for instance the material, the country of origin or the recyclability of a product. Every product has a Green Passport on our PF Store explaining in detail how we score the products. This makes it easy to compare products and make a choice based on your own sustainability strategy.

## CO2

To measure the environmental impact of our products we have calculated the CO2 footprint using an ISO 14067 certified carbon tracking tool. This tool aims to assess the environmental impact of a product through its life cycle, going from extraction, transformation, production, packing, shipping, and use of product to the end of life.

**Products  
selected  
with care.**

**As promised.**

We've categorised our products in this chapter in a straightforward and effective sequence, you'll discover cost-effective quality items. Followed by products with improved features and greater durability. And for the utmost in excellence, explore our trusted, branded articles renowned for their quality and performance. Furthermore, we are dedicated to sustainability. You can assess the environmental impact of our products through our Green Points system and the CO2 emissions of our items, ensuring transparency in our commitment to reducing our environmental footprint.

### **Recycled classics**

In our pursuit of environmental responsibility, we launched new and recycled versions of our bestselling articles. We are striving to replace existing products with more sustainable alternatives.
